What is that?

EB White  
"The Elements Of Style"

Mold "little" words around the feeling... to MATCH the words to  
the feelings

Small, simple word and see how it becomes Complex

"When a word or a sentence does not make senses, in most  
cases it is because there is complexity where there should be  
simplicity." - E.B. White

"Simplify." - EB White

"When in doubt, Simplify." - EB White

"IN SIMPLICITY THERE IS TRUTH." - Newton

"Humility"

"Listen" to the feeling

"Listening to the Intuition

"When it doesn't feel GOOD, I ALWAYS ASK WHY?"

What feels good = right = logical

Why doesn't it feel good?

1 - External? Am I being harmed?

2 - External? Is something contradicting my logic?

3 - Is my AIDNS broken?

4 - Evaluate the WORD... (Is the word COMPATIBLE with the FEELING?)

Words = logic = feelings are identical

Logical Comprehension

If it feels good,  
It is compatible with logical comprehension  
It is accepted

What does a WORD MEAN?  
WHAT IS A WORD FOR? What is it's purpose?

Wrong word = MISREPRESENTATION OF the FEELING
